PROFILE

A dedicated and detail-oriented Computer Scientist with a strong foundation in web development and systems design. Proficient in Python, Django, HTML, CSS, JavaScript, and mobile development using Kotlin and React Native. I possess hands-on experience developing dynamic web applications and managing technical projects. Known for mentoring fellow students, I excel in problem-solving, network configuration, and software optimization. Passionate about continuous learning, I am committed to leveraging my skills in diverse technical environments to deliver innovative solutions.

WORK EXPERIENCE

Equip Africa College Kitale   2024 MAY - 2024 AUG
ICT Support Staff

- Developed a Teaching Attendance Register System – Designed, hosted, and maintained a system that is still in use.
- Network Configuration – Learned and implemented network setup, including hosting systems on local networks.
- ICT Support – Provided technical support to both staff and students, including troubleshooting and resolving issues.

Leen Cyber Kibabii   2021 - Present
Manager and Service Provider

- Document Processing – Handled tasks related to formatting, editing, and finalizing documents for clients.
- Typing and Data Entry – Assisted clients with typing services and data entry tasks.
- Photocopying and Printing – Operated and maintained photocopying and printing machines to deliver quality output.
- Scanning and Uploading Documents – Scanned documents and uploaded them to various online platforms as required by clients.
- Customer Service – Provided exceptional service to customers, addressing their inquiries and offering solutions to their needs.
